BACKFIRE AND BLOWBACK DECREES

Daniel 2:21 (AMP) - It is He who changes the times and the seasons; He removes kings and establishes kings; He gives wisdom to the wise and knowledge to those who have understanding.

Galatians 6:7 (AMP) - Do not be deceived, God is not mocked; for whatever a man sows, this and this only is what he will reap.

Psalm 7:15–16 (AMP) - He has dug a pit and hollowed it out, And has fallen into the hole which he made. His mischief will return on his own head, And his violence will come down on the crown of his head.

Luke 8:17 (AMP) - For nothing is hidden that will not become evident, nor anything secret that will not be known and come out into the open.

I. Backfire

Backfire means a plan turns against the one who initiated it.

Back + fire = fire that goes backward.
Force meant to go outward returns to its source.

Backfire is immediate reversal.

Energy meant to go outward instead goes backward. The source is affected by its own force.

To backfire means a plan, action, or scheme produces the opposite of the intended result and harms or negatively affects the one who initiated it.

Backfire is tactical, short-term, visible and directly traceable to the act.

It's reversal of force against the initiator. In legal terms, if someone initiates an act that foreseeably causes harm, even to themselves, they remain responsible because the harm originated from their conduct.

Equity recognizes this pattern. If you dig a pit and fall into it, the consequence came from your own design. Psalm 7:15–16 shows this pattern clearly: He dug the pit. He fell into it. The violence returned upon his own head. That is backfire.

Backfire hits what is being done now.

II. Blowback

Blowback is not immediate. Blowback is delayed consequence. Blowback hits what was built over time.

The term comes from intelligence operations where covert actions taken years earlier eventually return to harm the initiating nation.

Blowback happens when:

- A corrupt structure is built.
- A long-term deception is embedded.
- A system is engineered to manipulate outcomes.

Blowback is structural, systemic, long-term, and often initially concealed.

Backfire hits tactics. Blowback hits systems. Backfire exposes an act. Blowback exposes an architecture.
